

Activity Report for the fiscal year 2003

1. The Mazak Foundation granted subventions to domestic and overseas individuals, universities, and laboratories that are tackling researches into and developments for new technologies of high-production systems in production engineering, machine elements, information communication technologies, machine tools, and peripheral equipment such as robots. It also honored young research workers who presented excellent research papers in machine tools.
2. There were 27 applications for subventions and 14 applications for papers.
3. As a result of examination, fifteen applicants were granted for subventions and nine excellent papers were honored.
