

## Activity Report for the fiscal year 2004

1. The Mazak Foundation granted subventions to domestic and overseas individuals, universities, and laboratories that are tackling researches into and developments for new technologies of high-production systems in production engineering, machine elements, information communication technologies, machine tools, and peripheral equipment such as robots. It also honored young research workers who presented excellent research papers in machine tools.
2. There were 28 applications for subventions and 15 applications for papers.
3. As a result of examination, fourteen applicants were granted for subventions and eleven excellent papers were honored.
